

# The CR-20

Mr. John's CR-20 is an innovative solution designed to address the unique demands of larger construction sites. The CR-20 is a rugged steel exterior with two private rooms built inside. Each room features restroom facilities with fresh water in a temperature controlled environment via a powerful HVAC system. High use capacity and rugged materials make the CR-20 a perfect solution for job site sanitation.

With built in water and waste tanks, an electrical connection is the only thing you need to take advantage of the state-of-the-art Mr. John CR-20 container restroom!
