

The CR-20

Mr. John's CR-20 is an innovative solution which includes a powerful HVAC system, fresh water, high use capacity, and rugged materials. Electricity ((4) 20 amp/115 Volt) is the only thing your site needs to be able to take advantage of this state of the art solution to job site sanitation.

The unit can be customized to include paper towels, 1.6 gallon flushing toilets and up to four toilets and three urinals on the Men's side. Contact one of our experienced and knowledgeable Account Executives to identify the unit which best meets your site's needs.
