

Holding Tanks

When there's running water but no sewer, Mr. John gives you the option of installing flushing toilets in your field or sales office trailer.

The wastewater holding tank, expertly installed by our Field Service Technicians, is an above ground unit so there is minimal disturbance. The unit is designed to fit under most trailers. We provide regularly scheduled service to accommodate your needs. Tanks are available in both 250 gallon or 70 gallon capacity.

> WASTEWATER CONTAINMENT

> Features
