

# The Premier

Luxury and elegance in a single unit...

Treat your guests to the most modern self contained restrooms on the market today. Premier restrooms feature all the comforts of home in a self contained\* unit, requiring no power or water supply to operate.

The Premier restrooms are able to operate as self contained,\* requiring no power or water supply to operate. A 12 volt system controls the water pressure and lights, and is recharged by a solar panel. This enables the unit to operate 24 hours a day with no hook ups. A specially designed motion detection system activates and deactivates the unit, preventing unnecessary power loss.

Premier portable restrooms are available as a single unit or dual unit restroom trailer and are backed by the service and support you've come to expect from Mr. John.

*\* Use of the unit's heater and fan would require a 110v electrical hookup. Heaters are needed during the winter months to prevent tanks from freezing.*
